ABOUT ME

From Buenos Aires, now living in Tel Aviv.

I'm a ReactJs developer also experience in backend. Came to Israel for a Masa Program, and currently doing an Internship in the Hi-Tech industry working on TagBox for 5 months.

Looking for a place where I can grow my professional career, learn from my partners, improve my technical knowledge and orient my professional career towards frontend development.

EXPERIENCE

ReactJS developer

TAGBOX | February 2021 - Present

- Responsible for the development of the chrome extension that allows you to create bookmarks and add tags. Done with ReactJs, React-Router, and Context.
- Frontend developer from main product working with HTML, CSS 3 and ReactJS and Mobx for state manager.
- Experience with component based structure and hooks.
- Build a service layer that retrieves information from APIs.
- Responsible for deploy on Amazon Amplify feature branches to test.

Java + ReactJS developer

GLAMIT | July 2020 - December 2020

- Internal system development using Java for backend and ReactJs for frontend.
- Main tasks: Development an API using controllers and services layer for the business rules; Implementation of DAOs for access to DB information; Training new team members.
- Tools: Spring Framework; GIT; Jira to ticket tracking.

PHP backend developer

GLAMIT | January 2019 - June 2020

- Development of new functionalities on PHP, based on Magento ecommerce system.
- Internal systems development in PHP, using Laravel Framework.
- Responsible for bug fixes development and fulfillment of SLA requirements.
- MySQL database design.

Tester Analyst

GLAMIT | March 2018 - December 2018

- Execution of Test cases, and reporting bugs and incidents in the Assembla tracking tool.
- Documentation of new functionalities.
- Process data gathering in order to improve system, making proposals of new functionalities to be implemented.
- Communication with development and business teams.
- API REST test and use of system databases.

Youth Department Director

Centro comunitario Kadima | March 2017 - February 2018

- Coordination of community leaders and supervisors on non-formal education activities.
- Responsible for supervising educational project; leading the planification of projects for the entire department with the purpose of education and transmission of jewish and human values.

Tester QA

Truelogic Software | April 2015 - February 2017

- Development of test plans based on products requirements.
- Tasks: Test cases execution; tracking the results on the Jira tool. Bugs and incidents reporting. Cross browsing test and in multiple devices.
